## In-Home Care Lymphedema Care: Find Relief Today

Lymphedema, characterized by chronic swelling due to impaired lymphatic flow, can significantly impact quality of life. Our In-Home Care services offer a personalized, professional approach to helping manage this condition comfortably at the patient's own pace in the comfort of their home.

### Key Symptoms:

- Swelling in arms/legs
- Aching, heaviness, or tight skin

### In-Home Care Solutions:

- Help with ADLs and compression garments as appropriate
- Support self-manual lymphatic drainage
- Motivational support for the Home Exercise Program improving circulation
- Decrease infection risk for skin health through proper hygiene

### Why Choose Us?

- Care in the comfort of home with caregivers
- Supporting the medical treatment plan with nonmedical solutions
